Best practices:

The engineers' week (Morocco e-Week) seems to have a very important impact on membership development at the section level especially among students. The set of events scheduled in these national-wide IEEE activities allows promoting IEEE in a very efficient way among students and engineers.

Topics to be discussed in London:

In order to promote networking among students at the R8 level and also the IEEE at the sections level, a R8 e-Week would be certainly of a very good help. If we can involve R8 student activities chair and R8 Gold coordinator we can come up with a very successful event with a very important added value to the IEEE membership in the region.
