Membership:
The IEEE Macedonia section has in total 159 active members by the end of February.
The member counts by grade is: 1 fellow, 1 life senior member, 21 senior members, 77 members, 31 graduate student members, 28 student members, 3 associates, 2 affiliates. Our expectation is that the student's membership will be increased in the half-year subscription.
Date of above results by using SAMIIIE: 27 February, 2011

Meetings:
During the period October 2011 – March, 2011, our Section organized: 9 technical meetings and 2 administrative meetings.

At the beginning of this year we have appointed new student coordinator.

Two new web pages were created by the PE, and CAS/CIS/CS Chapters.

The section has been adopted to the new National Law for Organi

Activities in the near future:
The first thing to do is to develop web pages for the chapters that don't have one. The activities have been started. The section will increase the cooperation with the ICEST conference series and will support the organization of the national ETAI 2011 conference. Membership development activities are planned, especially among the engineers working in companies other than Universities.

Best practices:
Section ExCom is collecting membership fees from students in local currency and fees are paying directly to IEEE from Section custody account.
