Membership:

The IEEE West Saudi Arabia Section has in total **251** members (around 125 are active) out of which 9 are Seniors, 25 Associate and 30 are Women.

Meetings:

4 technical meetings have been conducted since Oct. 2006, and a comprehensive action plan for 2007 has been developed in coordination with the Saudi Council of Engineers (Attachment-I). The Saudi Council of Engineers is the legal umbrella under which our section operates.

The Saudi Council of Engineers has already started advertising our activities and distributing it to all their members which must be viewed as a major achievement. A copy of the first announcement for two of our section's seminars is attached in Attachment-II.

Aside of technical Meetings, the Officers Meetings are being conducted on the first Sunday of every Gregorian Month to review all the activities, implement the scheduled actives and review the action plan.

Collaboration with National Society:

The Section continues to collaborate and cement its cooperation with the Saudi Council of Engineers.

Proposed International Conference:

The Section is planning to collaborate with the Saudi Council of Engineers, the Arab Science and Technology Foundation (ASTF), and many other national and regional organizations to organize:

"The First International Conference on Creativity, Innovation and Knowledge Sharing"

Current Activities:

1. Creating 2 Chapters one in Mekkah and the other one is a student chapter(collection of signatures for petition is underway). The student chapter has taken more time than expected, but should be finalized in the near future.
2. Setting up Section Web page – Scheduled to be launched in July 2007.
3. Arranging at least one Technical Workshops in strategic planning and Technical Writing in Arabic.
4. Initiating the Europe – Arab Electronics and Electrical Engineers Bridge and the Arab Council. The main advantage of the Arab Council is that our section can finance its activities for the Europe-Arab Electronics and Electrical Engineers Bridge through grants from regional financial institutions interested in promoting such initiatives and their policies dictates that they support regional entities such as the IEEE Arab Council.

Topics to be discussed in Sophia:

1. Tools to develop Membership – in the Industry as well as in the Academic Areas (More than 7 Universities and Colleges are located within the Western Region)
2. Raising funds to support Section Main Activities
 - a. Operating and Maintaining the website.
 - b. How can we make a better use of the new multi-lingual web facility.
