Membership: IEEE Section Ukraine at the end 2006 included in total 354 members (including 3 Fellows, 58 Senior Members and 71 Student Members). But this year the number of active members is less (approximately 310 members) due to internal problems of payment for the membership and periodical issues.

Meetings: 46 technical meetings and 6 international conferences have been held from October 2006 to March 2007.

Collaboration with National Society: The section continues to collaborate actively with the Ukrainian Union of Power Engineering Specialists and the Ukrainian Union of Engineers.

Problems and Activities in the near future:

- Problems with reception by the Ukrainian members IEEE of subscription editions proceed.
- There are difficulties in use of Digital Library.
- In our opinion, existing procedure of preparation of financial reports is very complicated and not clear as for officers of Section and for our bank employees.
- The future activity this year will be directed on the decision of problems on service of our members.

Topics to be discussed in Sofia:

The creation of the independent Georgian Section of IEEE instead of the Georgian Chapter of the Section Ukraine. The political events affect the normal communication of Section officers and Georgian Chapter.
