

Marc Apter  
Candidate For 2008 IEEE  
President-Elect

Region 8 Meeting  
April 2007

# Who Am I?

- I've worked as an Engineer (many different kinds)
- I've worked in other technical fields
- I've been a Manager and a Supervisor
- I've managed and dealt with budgets of millions to 10's of millions of US dollars
- I've chaired and/or held office in Chapters, Sections, Geo Councils, Societies, various BOD and OU Committees, and on Major OUs

IEEE needs to grow, not just  
change

# Some President-Elect Campaign Issues of September 1984

- Academia vs working engineers
- Too much Corporate influence
- Engineer supply
- Older engineers
- Undergraduate education; is engineering education adequate?
- Improvement of technical and educational services to members
- **Enhancement of status of members of the profession**
- Continuing education
- Application-oriented articles
- Portable pensions in the U.S.
- Employer support of employee's involvement in technical and professional activities

# Things I Intend To Have IEEE Address When Elected

- Offer new services and products as part of the full dues IEEE Member Package.
- Establish AdHoc to look at Publishing Delays
- Involvement of Local Sections before the fact, whenever the BOD/EXCOM, or any IEEE Director/VIP visits that area/country
- **Publicizing the accomplishments of our members to the public (local and...)**
- **We recognize academics, but what about working engineers?**
- Developing small inexpensive exhibits we can donate to small museums, that in a hands on way demonstrates one of our areas of interest and to introduce it to the public and especially to young/very young people
- Examining the dues structure for countries with income levels less than the U.S./Japan/Canada/UK/Germany/France/etc.

**Thank You**
