

IEEE Estonia Section Report March 2012

- 1. Highlights from the past**
 - 2. Future activities**
 - 3. Best practices**
 - 4. Points of concern / Topics for future discussion**
-

1. Highlights from the past

- IEEEExtreme participation with very good results, several teams in top 25
- 10th annual August conference

2. Future activities

- Plans to start the first Student branch in Estonia
- Working on increasing membership of power engineers, cooperation with local society
- More events organised by society chapters
- Cooperation with other Baltic Sea sections on distinguished lecturers

3. Best practices

- Our traditional 2-day August conference is going strong and is attracting good numbers in Estonian terms (30-40 people). Thanks to sponsors, the section has covered only a fraction of the cost and the event is free to participants.

4. Points of concern / Topics for future discussion

- Member and student activity level is low. While many are willing to attend events tailored to their interests, it is harder to find people willing to contribute.
