

Keys To Our Future

- ▶ Delivering value for working engineers
- ▶ Growing our IEEE community, worldwide
- ▶ Developing a IP publishing and conference process for the 21st century
- ▶ Increasing IEEE visibility

Value for Working Engineers

- ▶ Career Security across academic, governmental, and corporate sectors, accomplished through:
 - Expanded networking opportunities
 - Metro Area Workshops and Continuing Education enhancements
 - Practitioner magazines, conferences and interactive and live IP
 - Increasing our efforts with industry

IP for the 21st Century

- ▶ Integrated web of knowledge
- ▶ Work in the problem space, not technology stovepipes

Increase Visibility

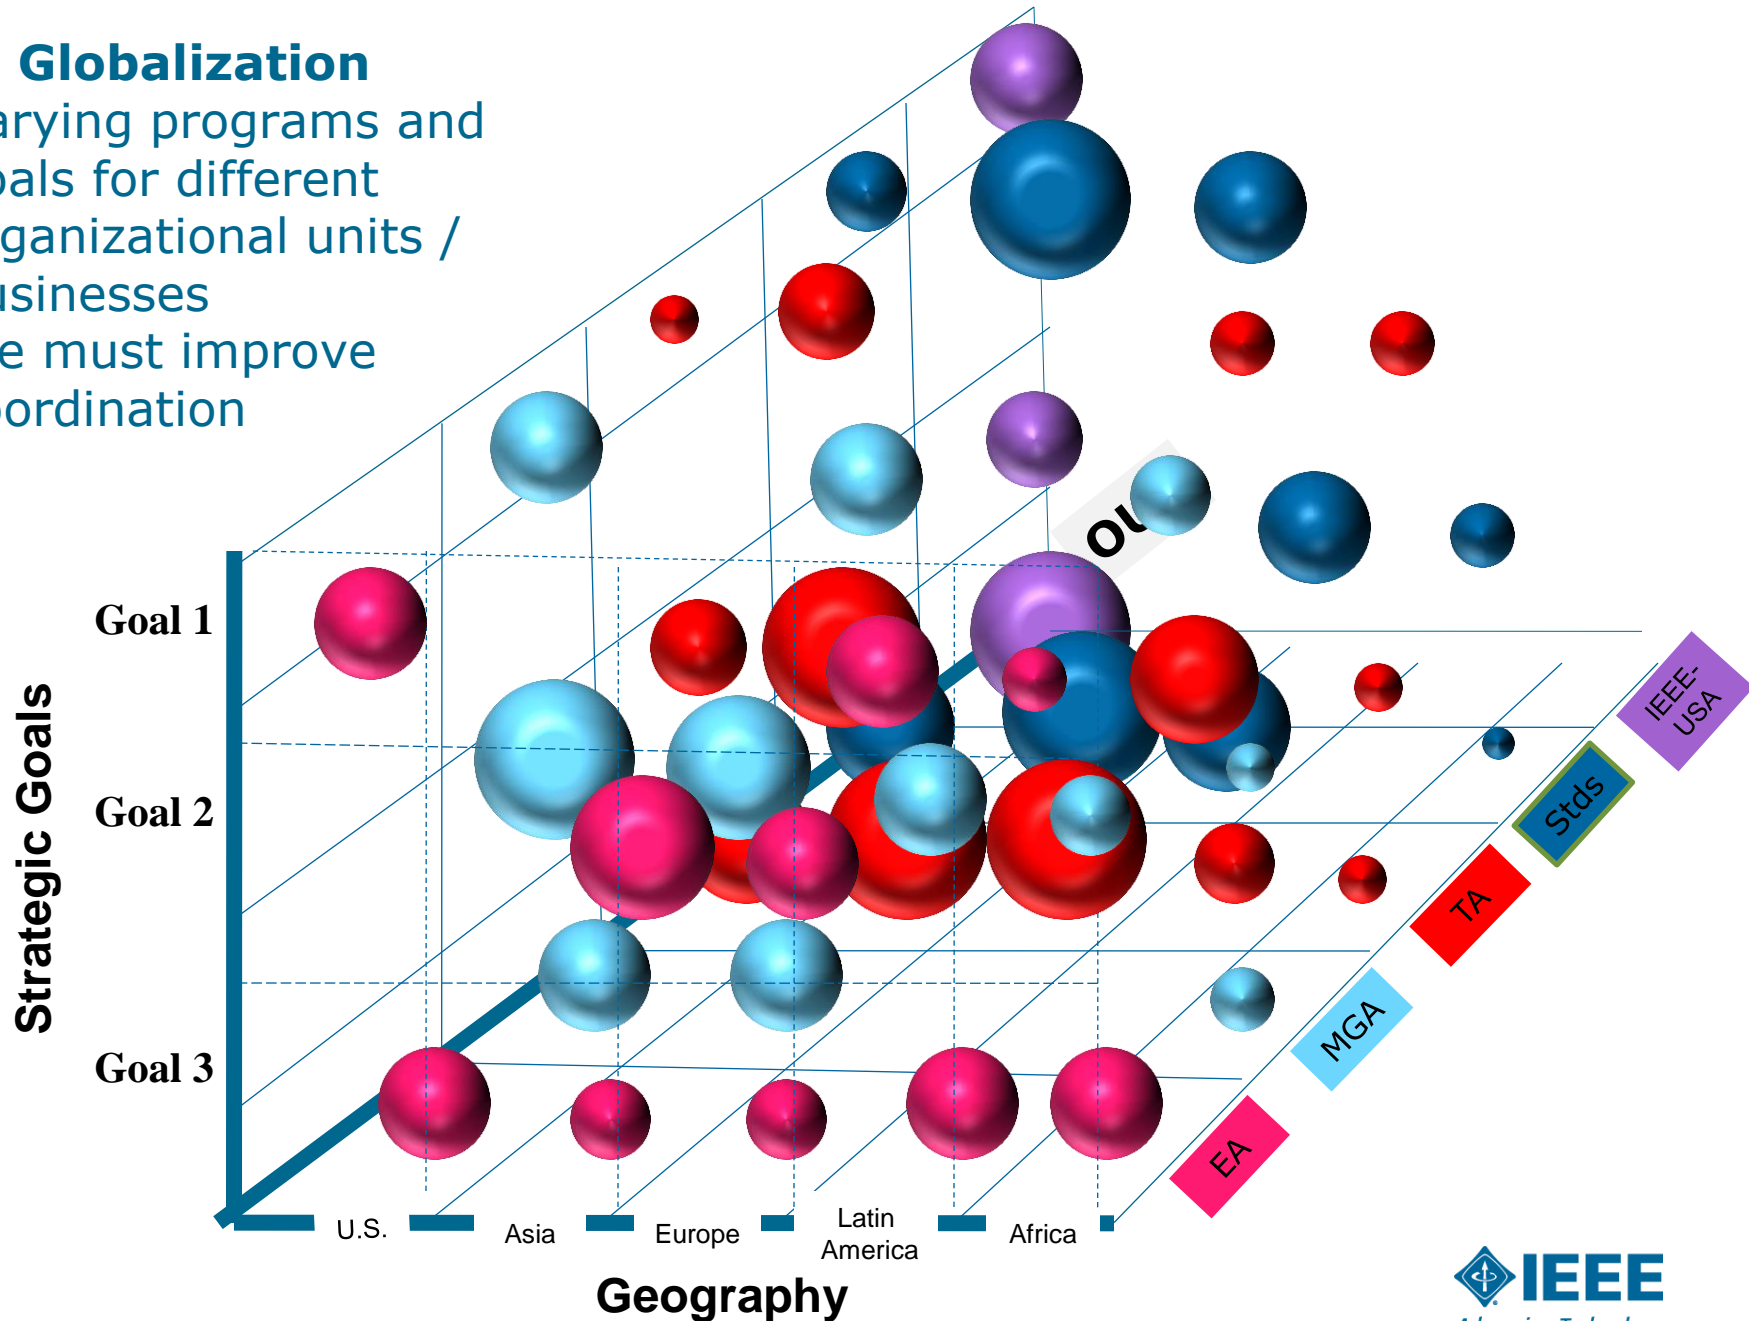

- ▶ Increase prestige, recognition and influence of the profession
- ▶ Increased employer support—our members are their lifeblood
- ▶ Impact public policy—our members literally invent the world we live

Public Visibility: Off to a Fast Start in 2014

IEEE Globalization

- Varying programs and goals for different organizational units / businesses
- We must improve coordination

Choose our Future

This?

...or this?

Input Needed From All Sectors of Our IEEE Community

- For our efforts to be successful, your input is critical
 - All voices must be heard, all insights, ideas, and perspectives considered
- Our strength is our community; our future lies in building upon that strength

Forming Ad Hoc Committees

- ▶ 2015 Ad Hoc Committees will address topics vital to IEEE's global future
- ▶ **Needed:** Leaders within our IEEE community, to share concerns of global membership, chart a course for a global, united future
