

## Goals

Region 8 News is the member newsletter published quarterly by the Region 8 committee. The newsletter aiming to inform, invite and inspire. First, the newsletter informs members about who, what, when, where and why of issues, developments, and activities that are related of IEEE. Secondly, the newsletter invites members to share information, insights, and experiences related to IEEE. Finally, the newsletter inspires current and prospective members by offering stories of successes and experiences of fellow members.

## Status and Past Contributions

- IEEE Region 8 News April 2015 Issue (34 articles)
  - Region & Section News 12
  - WIE News - 1
  - YP News - 4
  - Student News - 17

This issue has been focusing on the new leadership team of the committee with Director Costas Stasopoulos addressing challenges and opportunities for our region. The new SAC team and YP team introducing themselves to the members. Besides, we have the robot fight competition packed with actions from Egypt student branch and Egyptian Engineering day report. That said, we have also contributions from Young Professional AGs and other Student Branches.

- IEEE Region 8 News April 2015 Issue (33 articles with News in brief)
  - Region - 7
  - Section News 9
  - YP News - 1
  - Student News - 16

The issue has reported the milestone event for Abbey Road Studios in London, UK which is famous to host recording for the Beatles, U2 etc. and of course for the contribution Alan Blumlein to stereo recording. We have also reported the committee meeting held in Cyprus. We also brought the IEEE constitution debate to the Region 8 members attention and tried to explain what the discussion is about and how that would affect normal members.

## Outlook

- Inform  
We would like to inform members more about IEEE and the activities happening all over the regions.
- Invite  
We would love to engage the members more especially students and young professionals and invite them to share their actives and view of IEEE.
- Inspire  
We want to be the channel to inspire the next generation of members that will shape the future of mankind with technology and of course IEEE.

## Points of concern

Since we are a small team of 3 volunteers we would love your help and ideas regarding how to inform, invite and inspire our members especially the volunteers.
