

## **Norway Section**

**Yuming Jiang**

### **Getting Closer to Industry**

Nothing new to report.

### **Students and Young Professionals**

- At the moment, we have one Student Branch and one Young Professionals Group. They have been introduced by the Section to assist the Swedish Section in organizing a planned Nordic SYP Congress.
- Effort has also been made to promote IEEE to HiST, another university college in Norway, to possibly establish a student branch there. A meeting was organized at HiST in April 2015.

### **Section Vitality**

- Effort has been in encouraging the current Student Branch to keep its activities.
- Another effort is to promote IEEE at another university / college, i.e. HiST.
- We continuously encourage and support our members to organize IEEE sponsored or technically sponsored conferences in Norway. They include:
  - 22nd European Conference on Circuit Theory and Design (ECCTD), 24- 26 Aug 2015, Trondheim, Norway
  - 2015 Colour and Visual Computing Symposium (CVCS), 25-26 Aug 2015, Gjø, Norway

### **Miscellaneous / Recommendations / Feedback**

Thanks to Hasala Dharmawardena, the Norway Section has a new website: <http://sites.ieee.org/norway>
