IEEE

Building bedrock foundations beyond Borders

- Getting non-engineers involved in STE& I; STEM activities

- Planning IEEE Xtreme, STEP & TISP events with non-engineers

- Re-working the content of SPAC and SYP Congress to suit the need of the industry and internships

IEEE

Experience of past student leaders

› Taking a survey of submissions made by past student leaders: mentors, SB Chairs, Counsellors, and Staff Advisers will allow us understand the various <u>special</u> cases involved in diverse students' administration in IEEE Student Branches for Region8.

The lost keys' recovery

› A key is to open a/many door(s).

› IEEE Student membership can unlock many potentials in each individual or group of students, ranging from academic excellence to patenty and innovation, with little or minimal monitoring.

› Critical evaluation and assessment of the feat above will lead to early entrepreneurship and self discovery, to be self reliant and interdependent, which has direct positive impact on the society at large.

IEEE

Communications at his optimum

› Regular and interactive discussions need to be established and sustained at all cadres of students' administration, in every area of interest.

› Using webinars and teleconferences, lots of little issues will be resolved before aggravating into the big issue.

› Talking is easy but communications is key to understand the process, people, and event.

Thanks for listening!
