

Republic of Macedonia Section

Pero Latkoski

What activities/programs/initiatives work well in your Section to foster Industry Relations? What changes would be required by IEEE/the Region/your Section to improve Industry Relations? What were major successes since the last meeting in terms of Industry Relations? How are you going to continue to foster Industry Relations?

For many years our section has a problem with a very low number of members coming from the industry. In the past few years, the industry membership is around 10% of the total members, leaving the other 90% with academia background. In order to foster the industry relations, our plan is to find and appoint a suitable industry relation ambassador (or a whole team) who has an industry involvement at the moment and who will hopefully find a practical means to get the Section closer to our humble industry. The very first effort will be to determine the actual needs of the colleagues from the industry and to identify their benefits in joining and actively participating the IEEE society. Then we will try to organize meetings with the industry managers and higher level industrial executives to present the IEEE benefits and to recruit more members and volunteers among them.

What activities/programs/initiatives work well in your Section to Attract and Support Future Members, e.g., Students and Young Professionals? What changes would be required by IEEE/the Region/your Section to better Attract and Support Future Members? What were major successes since the last meeting in terms of Attracting and Supporting Future Members? How are you going to continue to support Students and Young Professionals?

The Section gives a special attention to the student membership recruitment and retention by informing targeted students about IEEE and by providing instructions and practical help for the students so they can easily pay the membership fee in our local currency. Recently an initiative has started to form new SSCS student branch. The Young Professionals are very active in our Section organizing several activities per year. The Section supports these events. Our Facebook page is continuously updated with the forthcoming events and all interested colleagues are invited to join regardless they are member or not yet. Almost 1000 people follow our posts about Section activities.

What activities/programs/initiatives work well to drive the vitality and sustainability in your Section? What changes would be required by IEEE/the Region/your Section to improve Section vitality and sustainability? What were major successes since the last meeting in terms of Section Vitality? How are you going to continue to foster Section Vitality?

At the end of 2017, we have successfully organized elections in all our units (by using vTools), so our Section met 2018 with all level officers newly elected or reelected. At the beginning of 2018 there was a joint meeting between the past and new officers, so proper transfer of obligations was achieved. Our plan is to continue with regular ExCom meetings where all activities will be planned. Section Facebook page will be regularly updated with information about our efforts and activities.

What are your recommendations to IEEE Region 8 and the Africa Area Chair Gloria Chuckwudebe to foster IEEE in Africa? How does your Section support IEEE Activities in Africa?

Maybe the IEEE R8 could organize and sponsor selected members and volunteers from Africa to visit and participate some of the IEEE events organized in Europe (e.g. flagship R8 conferences). Also bringing some R8 events to Africa could foster IEEE in Africa, as more members from there can participate the events without significant travel expenses.

What services and which kind of support would you expect for Region 8 and/or your section out of the new IEEE office in Vienna, Austria? How has the existence of this office influenced your section since its inauguration last year?

So far we didn't have any contact with the Vienna office. We expect that they can serve as a more accessible liaison to support us in the communication with the appropriate IEEE staff members and in getting more timely support when needed. For example, many of our valuable volunteers upgraded to Senior member level are waiting for their plaques for years.

Outstanding new initiatives, Special Achievements, Anniversaries.

Our Section has sponsored the biggest student event in the area of robotics called RoboMac which was held in the period 9th to 14th of October 2017 and was organized by the student branch. RoboMac is an international competition for robotics and artificial intelligence. The vision of this event is to popularize robotics among students and young people in the region.
