

Humanitarian Activities Subcommittee

John Funso-Adebayo

Goals

Increase awareness of IEEE Humanitarian programs and funding opportunities and help increase the level of participation by means of assisting, consulting, encouraging local groups and communicating the output of their work.

Progress against goals since the last report

- 1) We have developed and established a team operation manual, with clear role assignments and relevant success Key Performance Indices (KPIs) to drive Humanitarian Activities in the Region8;
- 2) We have established few network of Humanitarian Activity Ambassadors in each section (it is ongoing);
- 3) We have built the Region8 Humanitarian team capacity and knowledge (also ongoing);
- 4) We have increased the number of Humanitarian groups and projects in the Region8;
- 5) We have sustained a healthy and effective operation of these groups by remaining in contact and monitoring their status regularly;
- 6) We have spread the awareness within and outside IEEE on the funding opportunities offered by the Humanitarian Activities Committee (HAC) and Special Interest Group on Humanitarian Technology (SIGHT);
- 7) We provide managerial support and proposal writing support to all interested groups in the Region8 (it is ongoing as well).

HuAc participation in conferences, meetings or other events

HuAC 2019 Participation in Events and Conferences is attached below.

HuAc activities/initiatives planned

HuAC 2020 Participation in Events and Conferences is attached below.

HuAc activities/initiatives developed

We are developing Section SYP events and modular projects to support the Humanitarian UN SDGs across the Region8.

Proposals for improvements

More Section participation in Humanitarian Activities across the Region8 member countries.

Points of Concern

Critical issue is the budget. We need to cover representatives for the trips in Section SIGHT/HAC Events for 2020 and re-imburse the past events in 2019 where necessary. You can discuss with us if interested (ma-huac@ieee.org).

Other Issues to report

- 1) Request for Region8 to fund our first face to face meeting in Ottawa, Canada this year 2020;
- 2) Request to allow the Global Chairs for both HAC and SIGHT to make a presentation in Warsaw, Poland during the Region8 meeting;
- 3) Request to approve that our sub-committee be allowed to participate in the planning of the International Humanitarian Technology Conference (IHTC) 2020 for possible hosting of same International Humanitarian Technology Conference (IHTC) in 2021 in the Region8.
