Electronic Communications Coordinator (ECC)   George Michael

Goals

- Support the committee meetings;
- Maintaining and updating our website;
- Maintaining and updating our web server;
- Maintaining and updating our mailing lists.

Progress against goals since the last report

- Support the online committee meeting. Live streaming features improved with a setup which will not only stream the video footage from the monitors and the audio from the internal audio system but it will embed a video of the speaker as well.
- Performing content updates to our web server.
- New security feature updates to our web server.
- Maintain and update our mailing distribution lists
- Bug fixes from updates to our web server.
- Create new OU's websites at our web server.
- Support the chairs and appointed members online meetings.
- New custom page at our website for a list with Region 8 events and activities during covid-19. New functionality is implemented in order to give access to the website editors to be able to add any new event by themselves and be published automatically.
- New custom page at our website for a list with Events, Webinars, Podcasts, Trainings etc (not published yet. For now vTools event link used). For this, new functionality is implemented, with a custom form so everyone will be able to submit an event, and a approval/publishing procedure.
- New functionality for a custom suggestion form for our website (not online yet).

Points of Concern

Increased cyber attack attempts on our website.

Statistics: Number of visits, posts, followers

Proposals for Electronic Communication in R8 improvement

Further enhance technical tools, maybe with higher tier equipment than home user tier.
