Saudi Arabia East   Mohammad AlMuhaini

Section Vitality

The section organized a couple of webinars to promote for IEEE among students and young professionals. The student branches were also supported financially and provided with a list of speakers that can be invited to deliver talks. The section is planning to organize bigger events and initiatives that will attract new members to the section. The membership development officer will also plan to visit universities and companies to promote for IEEE.

Students

KFUPM

Jubail Industrial College

PMU-Male

PMU-Female

King Faisal University

Communication

Industrial Applications

Education

Signal Processing

Geophysics and Remote Sensing

RFID

Robotics and Automation (Under Processing)

Computational Intelligence (Under Processing)

Photonics (Under Processing)

Industry

The section collaborated with multiple industrial partners that nominated speakers for technical webinars. We will keep working to improve the level of collaboration through the following actions, - Inviting industry representatives to IEEE meetings; - Visiting industrial organizations and promoting IEEE; - Collaborating with industry in organizing technical seminars;- Contacting industrial organizations to sponsor technical dinner meetings.

Activities since the last report

We have organized more than 50 events since the last R8 meeting that includes webinars, workshops, and one symposium.

Planned activities

We are planning for a future PES conference in the second half of 2021.
