

- ▶ OpenWater Software (OWS) is a software that manages the awards program – or anything that involves an application and a judging process.
- ▶ IEEE R8 moved from fluidreview to OWS, making the awards program easier to use, more user-friendly and straightforward, for both the applicants / nominators and the judges.

- ▶ Application forms are used to apply or nominate for an award. Anyone can login to OWS and nominate or apply.

- ▶ Evaluation forms are used exclusively by the assigned judges in order to evaluate and score the applications, and select a winner.
