

Benelux Section

Claude Oestges

Section Vitality

As the ExCom agreed in 2020 that meetings should be scheduled three times per year, roughly in February, May and October/November. In 2022, two meetings were already held: February 21, 2022 and May 16, 2022 .

The IEEE Benelux Section is traditionally doing very well in retaining members as well recruit new members. The new members recruitment is mainly done via the student branches. Actively involve and engage doctoral students in IEEE activities is going better again. We stimulate these activities via the Section. Note however that a significant number of activities were still cancelled or postponed because of the sanitary crisis.

In February 2022, the membership was showing a slight increase (year-to-year comparison), mostly caused by an increase of graduate student membership. This increase was confirmed in May (6 % increase for the total Section membership on a year-to-year basis).

On April 8, 2022, an IEEE Milestone was awarded to the ‘String Galvanometer’ in Leiden. The event was a big success, with a large attendance.

Students

In the Benelux, we are addressing the future IEEE members in the Student Branches at the various Universities. This used to work quite efficiently, but was hampered by the sanitary crisis. Four branches are active for now: KU Leuven, Ghent, UCLouvain and Eindhoven. Some others are inactive: Twente, Delft, Antwerpen, Liège. Among all active student branches, only UCLouvain and TU Eindhoven managed to successfully organize a significant numbers of online activities. All active branches reported that the current situation makes it very hard to recruit new members. There are actually no incentives for students to get affiliated, so the section was glad to observe that the activities of the student branches have somehow in 2022, also with an improved coordination between sections. The Section is supporting the Student Branches financially and content wise as well. Students in the Benelux Section are very active in the IEEE paper contest.

Affinity Groups and Chapters

The vitality in the Affinity Groups and Chapters is related to the number and quality of the activities: in 2021, more than 50 events took place. However, larger physical events were mostly postponed. Stimulating to organize local activities like conferences, network opportunities, cross-chapter activities etc, is one of the actions of the Section. Chapters and affinity groups were also encouraged by the Section to see the current crisis as an opportunity as well, moving to more online events. In our ExCom meetings, we invite the Chapters explicitly, let them present their activities and help them wherever we can. Of course, some Chapters are more vibrant than others, but in general we are very pleased with the local activities in the Benelux.

Industry

There are a couple of things we do in the Section to increase industry participation in the IEEE activities. For a start, we try to find industry partners in the Section board. We also motivate Chapters to do the same. Some Chapters in the Section are even run by volunteers from industry. Regarding the Action for Industry (AfI) initiative, the Benelux Industry Ambassador has informed the AfI organizers that more clarity is required on the targets, which would lead to a better definition of the action points.

Activities since the last report

None to be reported.

Planned activities

The next ExCom meeting will be organized in October 2022, as an hybrid meeting.

How Region 8 can be of help to your Section, members, and activities

No particular challenge.

Any other issues of interest

None.
