Is there a platform within IEEE that connects mentors to mentees?

What is your advice for an early career person that going to a job/internship interview

What skillsets do you think are essential for one to progress upwards in the career ladder?

How did you get your first job ?

What is the best tip for a career shifter person ?

Example of Platform Career discussions

Describe some of the perks of being an IEEE member?

1 responses 9 views

Aleksandar M.

The IEEE helped me to spread my network worldwide, to meet new friends, and launch my career from the local/regional level to the international level at some point. It is a process, not a button to press. The IEEE offers the path and there are many crossroads for decisions, e.g. you can choose to be more active in technical activities inside one or more societies, or focus yourself on geographical activities in your country section, your Region. The section activities and activities of affinity groups as Student Branch, Young Professionals, and Women in Engineering are probably better to start for younger people. Later, with more experience, you can contribute more in the technical aspect and it is good to relocate some of your time to your society, e.g. Power Engineering, Communications, Computer as well as many others depending on your preferences and expertise.

Storytelling

Create a narrative by explaining the different areas in which IEEE can help members in their Career Progression

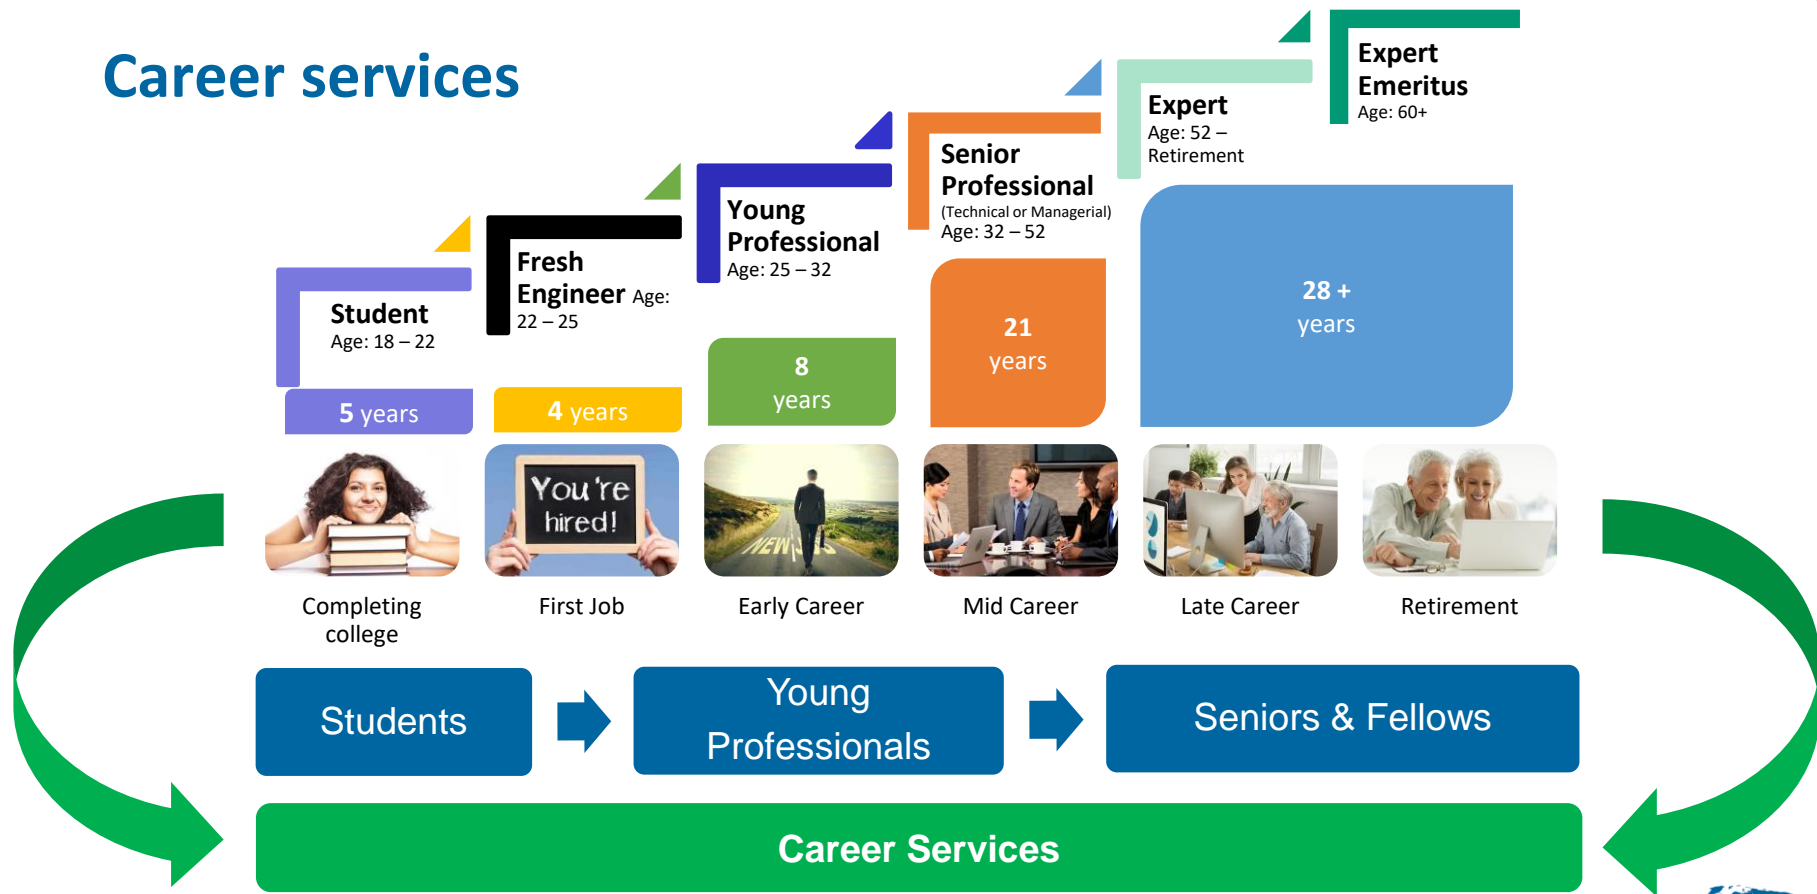

Authenticity

Personal details from first-hand experience to demonstrate how IEEE has helped him personally

Career services
