Nominations and appointments   Antonio Luque

Goals

This year the main goal is to organize and run the process for selecting a slate of candidates to 2025-2026 Region Delegate-Elect/Director-Elect to present to the Region 8 Committee during the Fall meeting for approval.

Secondary goals are to promote nominations from R8 members to MGA and IEEE positions, and to collect a pool of potential volunteers to recommend for appointment in the future.

Progress against goals since the last report

The first call for nominations was released on 1 March through an enotice message to all members in Region 8. Deadline for submitting nominations is 31 May.

Platform for nominations

The platform chosen for collecting nominations is OpenWater, the same environment used by IEEE nominations and awards. It has been setup for the first time for R8 nominations.

Points of Concern

Good nominations are essential for the N&A Committee to be able to select good candidates. Please nominate yourself or your colleagues.
