

## Strategic Planning Committee

Antonio Luque

### Goals

To assist the Region 8 Committee to develop in an appropriate manner to meet all the IEEE-related needs of the Region and to continue to adhere to the R8 Committee Vision and Mission and to advise on amendments to this Vision and Mission and to monitor compliance with the IEEE Strategic Plan.

### Progress against goals since the last report

The Committee held a meeting in Bucharest in conjunction with the R8 Committee meeting. The agenda contained three topics that had been selected previously as priorities by the members:

- Industry
- Coordination among Sections and other units
- Membership retention

Members of SPC and guests shared ideas on these three topics. Next steps will be to combine these ideas and proposals, prioritize them, and compile final proposals in a document to be shared with stakeholders.

### Points of Concern

There is no continuity in the strategic planning, and many of the discussions and proposals are not passed to the next leadership of the Region. We will consider procedures that ensure that the documents produced by the committee are accessible to the next leaders of the Region for their possible implementation.
