

Nominations & Appointments Committee

Antonio Luque

Goals

This year the main goal is to organize and run the process for selecting slates of candidates to 2025-2026 Region Vice Chairs and Zone Representative to present to the Region 8 Committee during the Fall meeting for approval. The R8 Committee will also elect the members of the N&A Committee 2025-2026.

Secondary goals are to promote nominations from R8 members to MGA and IEEE positions, and to collect a pool of potential volunteers to recommend for appointment in the future.

Progress against goals since the last report

The first call for nominations will be released in early March through an enotice message to all members in Region 8.

Platform for nominations

Following the setup used in 2023, the platform chosen for collecting nominations is OpenWater, the same environment used by IEEE nominations and awards.

Points of Concern

Good nominations are essential for the N&A Committee to be able to select good candidates. Please nominate yourself or your colleagues.
