

New LMAG in North Macedonia

By Goce Arsov, LMAG Chair

North Macedonia LMAG (LM80077) was approved on November 29, 2021. The interim chair was Goce Arsov (Life Senior). The official elections for LMAG officers were held at the section annual meeting and Goce Arsov was elected as LMAG Chair, Georgi M. Dimirovski as LMAG Vice Chair and Pero Latkoski as LMAG treasurer. The LMAG has very good relations with the Section itself and the Section Society Chapters as well. Since its establishment LMAG organized, sponsored or cosponsored several activities. In 2022 all activities within the Section are dedicated to the 25th Section Anniversary and the 75th anniversary of the transistor. One of the special talks was “Celebrating 75th Anniversary of the Transistor” delivered by LMAG Chair Goce Arsov as an invited talk at the Summer Symposium on Electronics and Signal Processing held in Krusevo June 24-25.2022 (Fig.1). The presentation will be repeated at the celebration of the IEEE Day. As a Section founder and its first Chair Goce Arsov was invited to deliver a talk at the Section Meeting organized to Celebrate its 25th Anniversary. Besides mentioned activities, our friend and LMAG vice-chair, Prof. Georgi M. Dimirovski was awarded with Regional (R8) Individual Service Award which will be presented to him in person at the R8 LM meeting in Prague this year. For this purpose, both, the chair and the awardee, will attend the meeting in Prague.
