Remembering Tony Davies

1936-2025

Professor A.C. (Tony) Davies of King's College London, died on 22 March 2025 from heart failure. Tony was a Life Fellow of IEEE, and was an active member of the United Kingdom and Ireland Life Member Affinity Group until his death. He was also R8 LM Committee Member 2021-24.

Tony held many volunteer positions in IEEE, beginning in 1975 as UK and Ireland Section Secretary, eventually becoming Section Chair in 1992.

He was elected as Region 8 Director (2003-2004) and was particularly active in developing IEEE activities in the countries of Eastern Europe and Russia. He served as Vice President of the IEEE Circuit & Systems Society, and made many contributions to the work of the Society in Student, Chapter and Conference activities.

His technical achievements were mostly in the fields of digital signal processing and circuit theory. Tony was an early exponent of short courses in microprocessor engineering. As a Life member he organized IEEE activities in the History of Technology. With his seemingly tireless energy, good humor, and gregariousness, Tony stood out at every meeting he attended, from student meetings right up to the Board of Directors. Working with Tony was always an enjoyable and rewarding experience widely appreciated by his IEEE colleagues.
