

2. May 12 –14 2025

The 5th edition RoboMac Junior

The goal of this competition is to promote STEM fields such as robotics and artificial intelligence **between students and the youth** in North Macedonia and neighboring regions, while initializing and supporting the function of many other projects related to robotics.

The competition took place at the premises of FEEIT, involving 54 fourth-year students from 30 high schools across the Republic of North Macedonia, divided into two categories. In addition to the competitive activities, participants had the opportunity to attend several lectures on popular topics in robotics, artificial intelligence, and electronics, delivered by professors and experts in the field.

AUTONOMOUS MOBILE ROBOTICS

SMART ELECTRONICS FOR AUTONOMOUS VEHICLES

The agenda for the event can be downloaded from

https://feit.ukim.edu.mk/wp-content/uploads/2020/11/3-3_agendarobomacjunior_public.pdf

The top 3 teams in each event were awarded medals.

The students attended lectures on Mobile Electronics, Robotics & AI.

From the opening session: The Dean of FEEIT addresses the Participants

This 3 day event was sponsored by the IEEE North Macedonia Section and its entities including the North Macedonia LMAG
