Dear IEEE Life Members,

As you may know, on Nov. 8-9 at ENTER Technikwelt in Derendingen SO, the Vintage Computer Festival and the IEEE Swiss Computing History events took place.

The very large available space of the ENTER museum allowed for multiple parallel activities. The exhibitors of the VCF demonstrated their hardware and software on rows of tables and a flea market was organized.

The IEEE had a temporary exhibition of Swiss computers mirroring the conferences that took place in two parallel tracks.

About 1000 people joined the event for one or two days. The presenters and attendees greatly appreciated this opportunity to share their experiences of the recent past. Historians shared their studies about the World Wide Web debuts at CERN and about their research on video games developed in Switzerland.

Conferences in English, German or French, with slides in English, are recorded and edited. They can be found under: www.youtube.com/@VCFCH/videos [2]

Best wishes for the holiday season and the new year,

Michel Bron
