Student Mentoring Training Workshop - Writing and Publishing Research Papers

The IEEE France Section Life Members Affinity Group (LMAG) and the IEEE Region 8 Student Activities Committee (SAC) jointly organized the Student Mentoring Training Workshop, “Writing and Publishing Research Papers,” on October 28, 2026. The workshop with about 30 participants was held at CNAM in Paris, France, in conjunction with IEEE R8 EnergyCon 2026. It provided practical guidance on structuring research papers, navigating the publication process, and effectively using digital research resources such as IEEE Xplore.

The workshop featured two invited talks, delivered by Beth Carpenter, IEEE Client Services Manager, and by Prosper Chemouil, IEEE France Section LMAG Chair. The talks were followed by an interactive session entitled **“**Writing for Publication: Interactive Exercises and Practical Guidance.**”** This part enabled participants to put theoretical insights into practice through a collaborative simulation. Working in small teams of five to six, participants selected a research scenario and developed a publication-ready paper blueprint. Each team also took part in a brief peer-review exercise.

Feedback collected after the event indicated that the workshop was both relevant and valuable for students and early-career researchers.
