

HISTELCON 2019

18th-19th September 2019

Technology and Innovation Centre, Strathclyde University, Glasgow, Scotland

www.histelcon2019.org

Organising Committee

Tony Davies (UK)
(conference chair)

Roland Saam (UK)
Nick Wainwright (UK)
(webmaster)

Jacob Baal-Schem (Israel)
John Liffen (UK)
Graeme Gooday (UK)
Mike Geselowitz (USA)
Bill Buchanan (UK)
Elena Hererea (RO)
Nina Borisova (RU)
Pierre Mounier-Kuhn (FR)
Liesbeth Demol (FR)
Antonio Savini (Italy)
Isao Shirakawa (Japan)

Representing other organisations

Isobel Falconer (BSHM)
Troy Astarte (BSHM)
Martin Campbell-Kelly (CCS)
Andrew Herbert (TNMOC)
Elisabetta Mori (LEO)
William Sandham (IET Scotland)
Emilie Tesinska (USD - CZ)

Conference Treasurer:
Adam Jastrzebski (UK)

Technical Programme Committee

Chair: Marwan Al-Akaidi (UK)

in preparation

Local Arrangements Committee

Chair: James Irvine (UK)

Greig Paul (UK)
Lesley Turan (UK)
Liam Bedwell (UK)
Penny McLeod (UK)
Bill Buchanan (UK)

in preparation

Call for Papers

Overview: HISTELCON is an IEEE Region 8 conference covering topics in the area of Technology History, held about every two years.

HISTELCON 2019 will be held in the IEEE UK and Ireland Section, at Glasgow, Scotland. The primary theme is 'historic computers' with an aim to include papers on those inventions and developments which have not already been the subject of extensive historical publications, and to include the contribution that special purpose processors have made to the development and use of advanced digital signal processing methods in many applications areas. Sessions to cover other aspects of technology history in the electrical, electronic and related fields will also be welcome and will be provided for.

In accordance with the traditions of previous HISTELCONs, the conference will include invited keynote lectures as well as submitted, reviewed contributions.

Among the computer topics which might be included are, for examples, the history of the F100L and the Viper microprocessor, the Mascot real-time software design method, the Transputer, the ARM computer designs, and the impact of digital signal processing microprocessors including the TMS 320 for the implementation of very sophisticated signal processing algorithms.

The aim will be to keep the conference affordable, with reduced registration fees for IEEE members and students and members of co-sponsoring organisations.

Submission of papers deadline: - 4th March 2019

Paper acceptance notification - 6th May 2019

Final paper submission - 23rd July 2019

Papers should be submitted via the website: www.histelcon2019.org

Papers accepted and presented by an author at HISTELCON 2019 may be submitted for inclusion in IEEE Xplore® and in some cases, the author(s) may be invited to prepare a revised or extended version for IEEE Xplore®.

Suggestions for or questions about papers and plans to submit should be sent to the organisers as soon as possible, if possible with a title and abstract. E-mail contact to: conference@histelcon2019.org

Submitted Papers should be of two to four sides (A4) and preferably prepared in accordance with the conference template using Microsoft Word. The template is available to download on the conference website. Authors who have difficulties in complying with this requirement or who wish to write a longer paper or have difficulty in using the on-line review system are recommended to contact the organisers as soon as possible to request special arrangements. Use of A4 paper size rather than US Letter size is strongly recommended.

The language of the conference will be English (including lectures and printed material).
